EDUCATION

University of Georgia
Bachelor of Science in Computer Science

University of Georgia
Minor of Arts in German Studies

PROJECTS

Github

Pokemon Fan Site
- Built using Next.js with the React library. Hosted and deployed from Vercel. The site's "Pokedex" feature fetches json data from a 3rd party consumption-based API. It finds and displays pokemon names and images, and clicking a pokemon entry brings the user to a page that displays their statistics and information.

SKILLS

Programming Languages: Java (Intermediate), Python (Intermediate), C++ (Intermediate), Javascript/HTML & CSS (Intermediate), PHP (Intermediate), SQL (Intermediate)
